

Date 28-29 March 2023

Clinical Content Leads: Professor Akbar Vohra and Professor Kayode Williams

This event is aimed at the practicing anaesthetist, trainees and consultants. It has an eclectic mix of topics that might otherwise only be found in specialist meetings. Topics include medical of patients presenting with medical problems; management of patients presenting with issues associated with chronic pain; management of patients at the extremes of age; developing and supporting colleagues; and basic aspects of anaesthesia.

Key learning objectives include:

- Managing the patient with hypertension
- Managing patients presenting with diabetes, pheochromocytoma and frailty.
- Stabilising the sick children for transfer
- Management of patients presenting with facial pain
- Developing simulation and lessons from mentoring practice to help support training and colleagues.

The faculty consists of experts from around the world. It includes specialists in medicine, paediatrics, anaesthesia, and chronic pain medicine.

The participant will be able to achieve many of the more difficult CPD requirements for maintenance of excellence in clinical practice. They may be more able to develop and improve their own local area of work.
