

Remote Fellowship

Ethiopia Anaesthesia Development Project

Posts commencing August 2023 for 6 months duration for a part-time **Remote Global Anaesthesia Fellow** with Ethiopia Anaesthesia development Program. Flexible start date can be arranged.

The Ethiopia Anaesthesia Development Program (EADP) is a partnership between Addis Ababa University (AAU), The Canadian Anaesthesiologists Society International Education Foundation (CASIEF) and Global Anaesthesia Development Partnerships (GADP).

EADP provides educational and clinical support to the anaesthesia training program at Addis Ababa University. The program has been expanding rapidly in recent years and currently numbers over 90 residents.

The Remote Global Anaesthesia Fellow will support in country fellows in strengthening and developing the existing training program. The activities will vary depending on the needs at the time, but are likely to include: facilitating remote case-based discussions, remote teaching sessions or journal clubs, coordinating mentorship program and supporting

local residents with QI and research projects. There will also be scope to develop the program based on your own skills and interests. We encourage you to leave your mark.

The post requires equivalent of one day a week time commitment. It would ideally suit post-FRCA trainees who work part time or are having a career break. It is an opportunity to become a part of a diverse international team and to gain a unique insight into anaesthesia training in Ethiopia, without having to travel abroad. Working remotely can be challenging and requires commitment, flexibility and cross cultural communication skills. Fellows will be supported by a remote supervisor.

For more information or to express an interest please email **EADP@casief.ca** including a copy of your current CV.

Closing Date: 16th July 2023*

*We reserve right to close before that date, if there is sufficient number of candidates.
