10–11 November 2016
Event organiser: Dr D Ray

OVERVIEW

A two day simulator-based course designed to teach the knowledge, skills and attitudes required to safely manage the airway and post-intubation period in an emergency situation outside the operating theatre, such as rapid sequence induction in the ED resuscitation room.

The course is taught by an experienced faculty using small groups and high fidelity patient simulators, who facilitate delegates to build their competence through realistic scenarios.

AREAS COVERED DURING THE COURSE

- Difficult and failed airways
- Paediatric workshops
- Post intubation
- Surgical airway skills
- Human factors in airway management

WHO CAN ATTEND & COURSE REQUIREMENTS

Experience in anaesthesia and intensive care is mandatory; a working understanding of anaesthetic drugs and equipment required. The minimum requirement of basic anaesthetic competencies should have been achieved as well as the experience of delivery of general anaesthesia independently.

Aimed at doctors 3–4 years after qualification with particular relevance for doctors intending to pursue a career in anaesthesia, critical care, emergency medicine, acute medicine or pre-hospital emergency medicine. Consultants & SAS Doctors are also welcome.
