

Giving Anaesthesia Safely Again

Return to Work Simulation Course

Friday 14 January 2022

Venue: Bradford Royal Infirmary

Clinical Content Lead: Dr Jill Horn, Consultant Anaesthetist, Bradford Teaching Hospitals NHS Foundation Trust

Returning to work in anaesthetics after a period of time away, for example maternity leave, research or experience in a different specialty, can be daunting.

If you have had a break of three months to two years, the GASagain course is designed to build confidence and is structured to provide you with the strategies for managing a return to work. You will practice both common and unusual clinical scenarios in the simulator to refresh your skills and participate in a series of workshops, underpinned by short relevant lectures, to review key areas and update you on the latest in the world of anaesthesia.

The course is delivered in a supportive environment and complements keep in touch days or workplace support.

The course has limited spaces to provide individual attention.

We are doing everything possible to maintain everyone's safety, please visit Bradford Teaching Hospitals education website for all COVID-19 SOP's and guidance www.bradfordeducationandtraining.nhs.uk
